

**MIDNIGHT RUN
NOVEMBER 9 - 10, 2012
ROUTE INSTRUCTIONS
ALL GROUPS**

Please read the General Rules and Regulations carefully. Ask a rally worker for clarification if necessary. Drive safely and legally at all times. Watch for ALL types of road hazards. Heed ALL posted road signs. Be extremely mindful of unpredictable local traffic at all times. If you smoke, use your ashtray. Please don't litter. Please watch carefully for wild animals, especially around dawn. Watch for range cattle. Be very careful of children, animals and slow farm vehicles near isolated rural homes.

Please be aware of traffic behind you. Different classes run slightly different courses and may have to run at different speeds. It is a rule of ITN rally etiquette to let cars needing to run faster get past you at the first safe opportunity. Please remember this is not a question of who has the better car or who is the better driver. Furthermore, documented instances of deliberate blocking will receive a MAX penalty for that leg.

At Checkpoints, please get COMPLETELY out of the traffic lane when creeping. Last car in line MUST run their emergency flashers. Be sure to check your mirrors when pulling out to cross the hose. At Standoffs, you MUST park far enough OFF the road so that your door, when opened, will not extend into the traffic lane. Unless otherwise stated, if there is one Standoff at a location, then 4.00 minutes have already been included in the leg time for you to sign in at Standoff and be given your information. If there are 2 Standoffs at a given location, then 6.00 minutes have been added. No matter how many Standoffs are at a given location, you should only go to that location ONE TIME. You do not need to go back for the other leg(s).

All Checkpoints, Standoffs, and Course Controls on this rally will be deemed open for the entire rally. All numbered highways, federal and state, are SAFE for this rally.

WARNING: There are a number of ungated RR crossings on tonight's route. CA law requires you come to a full stop before such crossings. You'll want to do this because most of these crossings are EXTREMELY ROUGH and will break your car at speed.

It is less than 120 miles to the first gas break.

ADDENDUM TO GENERALS:

- 1 Section B.8. (Passage Controls) does not apply to this rally. All Checkpoints are intended to be active. If you reach a point where you think you are on the right road for the Checkpoint and have gone past where you think it should have been, then assume it's not there for whatever reason and go on to the next Leg.
